Subject: Re: Surety Concurrence PR Springs - M0470090 /Archeological

You assessment of the reclamation surety is acceptable to the Trust Lands Administration. I have reviewed my filed and find that there is no documentation regarding an archeological clearance.

Will - I have reviewed the Notice of Intention for the Large Mine at PR Springs submitted by Earth Energy Resources, Inc. for their Asphalt Impregnated Sand in Uintah - Grand County. They have requested 213 acres of disturbance. The first stage of mining will include:

process facility - 15 acres

2 pits - 93 acres

2 valley fill dumps - 70 acres

topsoil storage - 18 acres

haul roads - 17 acres

Future expansion will backfill the first stage pits.

The reclamation surety is determined to be \$1,449,400 for the 213 acres. Future expansion of mine will backfill the first stage pits. Please send your concurrence via email.

There is no documentation in our files from SHPO or an archeological clearance. Do you have any records on the area.

Thanks !
